

STUDIO **WILLIAM**
CUTLERY

WHO WE ARE

Studio William is an English cutlery company led by founder and award-winning industrial designer William Welch with a mission to create pioneering products that enhance the dining experience. To many who love dining, Studio William owns a unique space in the world of cutlery.

Our high-quality cutlery is crafted using a combination of industrial processes and hand finishing. We're cutlery obsessives and possibly described as geeky, it is simple... **we love what we do.**

OUR DESIGN STORY

William Welch is the contemporary cutler with impeccable design credentials, design heritage and an obsession for cutlery and nature. At Studio William, we are cutlery geeks, designing beautiful and elegant sensory forms. Our joy is enhancing the dining experience from texture, to sight and touch to deliver a memorable interaction with food. We live and breathe nature and it inspires our cutlery designs with a particular focus on the character and beauty of trees.

MEET WILLIAM

HOW CUTLERY IS MADE

INTERNATIONALLY ACCLAIMED BRAND

Today we are thrilled to have won more international design awards than any other cutlery company on the planet. Over the past two decades, we have created numerous award-winning cutlery ranges, which have been recognised across the design world. Studio William cutlery is in permanent museum collections around the world including the Victoria & Albert Museum London, The Design Museum London, the MAK Design Museum in Vienna, Roddot Design Museum Essen Germany, and Chicago Athenaeum Museum of Architecture and Design.

OKINA SATIN

Satin Finish & Heavy Weight

Okina is the physical embodiment of Yin & Yang, light and dark. Two contrasting knife designs, form part of one contrasting collaboration; the Orient inspired curvaceous knives and the European minimal straight knives. Okina allows users to change the aesthetic of the table setting through the switching of different knives, whilst using the same forks and spoons. The playfulness and adaptability we love, use the straight knife for lunch service, and the curved knives for evening service.

AROLLA MIRROR

Mirror Finish & Heavy Weight

The Arolla tree is a form of pine tree widely found across central Europe, most commonly in the Alps and Carpathian mountains. Arolla has weight and substance, but is perfectly balanced. It's organic and asymmetric lines have been designed to be ergonomically and aesthetically appealing. The form of the knife blade compliments the clear lines of the spoon and forks. The design leads itself to fine dining and signature dining locations.

KARRI MIRROR

Mirror Finish & Heavy Weight

The Karri tree is a type of eucalyptus tree found in Western Australia and is considered sacred by the Aborigines. Karri's minimal straight appearance is both confident and innovative. The heavy gauged steel of the forks and spoons give beautiful weight and balance. The standing-up knife blade is sleek, with no traditional bolster from handle into blade. A gorgeous seamless transition from handle in blade. It is very comfortable to hold in the hand and use.

KUMQUAT MIRROR

Mirror Finish & Heavy Weight

Kumquats are native to the Asia-Pacific region and the Cantonese use this fruit in medicine and it can also be used as a popular alternative to an Olive in a Martini. Elegant and poised, Kumquat knives have been specially created to blend into our Karri pattern, for those who wish to have an alternative to this pattern's stand-up knife. The form has simplicity and sophistication. The clean straight lines are balanced with soft, oval sections of the handle.

ROYAL OAK MIRROR

Mirror Finish & Heavy Weight

Hidden beneath the handles is a reference to the historical “King’s Pattern”. This can be placed on display on the table, or concealed like the King himself. The Royal Oak is the name given to the oak tree in which Charles II of England hid to escape the Roundheads during The Battle of Worcester in 1651. An ancient oak, thought to be from an acorn from the original, still stands at Boscobel in Shropshire.

MAHOGANY SATIN

Satin Finish & Heavy Weight

The fruit of the Mahogany tree is the inspiration for Mahogany cutlery. The shape of the fruit was imagined to be pressed into metal to create a spoon bowl. The strong Mahogany trunks, inspired the slender to thick tapered handles. Mahogany cutlery has been designed to highlight the functional area of a utilitarian object by making a feature of the manufacturing processes that go into creating cutlery. The edges of the handles are finished with crafted radii to ensure a delicate ergonomic feeling to the hand, whilst the varying thickness gauges in the handles have been engineered for refined weight and balance.

TILIA CRACKLE

Mirror Finish & Medium Weight

The newest addition to this range adds a textured and tactile element to the otherwise minimal design. Tilia Crackle features a crackle inspired texture debossed into the front and back of each handle, blending seamlessly into each utensil head. Tilia Crackle decoration is inspired by the crackled glazing applied on to dinnerware, where, during the kiln firing process, the glaze cracks and makes a beautiful irregular optical effect. Available in mirror polished finish only.

BALSA MIRROR

Mirror Finish & Medium Weight

Balsa features unique and dynamic details, that compliment and enhance your dining experience. Balsa is a very popular material to use when model making and the very first models of Balsa were made using this versatile wood. Deliberately elongated and slender looking fork heads and spoon bowls enable the diner to pick up smaller food portion sizes, this allows the diner to really think about the tastes and textures the chef has created.

LARCH MIRROR

Mirror Finish & Medium Weight

Design concept: historical modern. Looking back to the middle 1700's when deer antlers were used as handles for cutlery.

William designed Larch to be a modern curvaceous interpretation of this era. The curved 1700's knife blade and three pronged fork heads, re-designed to perform to modern expectations of today's performance needs. A great range for historical/grand properties, character interior designed restaurants. Also recommended for banqueting.

REDWOOD MIRROR

Mirror Finish & Medium Weight

Inspired by classic cutlery styling. The Redwood design concept carries the spirit of the violin “fiddle” shaped handle into a new clean uncluttered look, with curved-shaped handles on forks and spoons. This pattern’s aesthetics suits both contemporary and traditional settings, in particular ADD and banqueting.

JAPANESE CHOPSTICKS

Japanese chopsticks frequently are square in the handle, and the tips are more pointy and thinner in size. They are beautifully balanced, light, so as to be very agile in the hand. The characteristics of the simple classic style with tiny logo detail at the end, allow for a character and premium design detail.

OUR SUSTAINABLE COMMITMENT

Our mission is simple- to design and make beautiful and elegant cutlery made to last generations. That makes Studio William inherently sustainable as after our cutlery has been cherished over generations it can easily be recycled. This is only possible by using high quality solid 18/10 stainless steel and master tooling craftspeople who refine the nuances of each edge, curve and contour. We are proudly part of Ecovadis who provide a definitive benchmark for ethical and environmental standards across many industries. The commitment to fully sustainable packaging using natural materials goes across our whole business. In 2022, we made the change to plain card inner cartons, biodegradable poly bags and paper tape for all new factory orders.
